Projects

Portfolio [🔗](#)

A personal portfolio website built using React.js, showcasing my projects, skills, and resume. The website features responsive design, smooth scrolling, and interactive UI elements. Built with HTML, CSS, JavaScript, and React.

E-commerce [🔗](#)

BuyBusy – E-commerce Website A fully responsive e-commerce website built with React.js and Firebase. The site allows users to explore and purchase a variety of earrings for girls. Features include product listing, detailed product pages, add-to-cart functionality, user authentication, and order tracking. Product data is managed locally while Firebase handles authentication and order storage.

To-do App [🔗](#)

A feature-rich Todo application built with React.js. Users can add, edit, and delete tasks, set due dates and priorities, and track progress. The app supports task categorization (All, Active, Completed), filtering, and a visual progress bar to enhance productivity. Designed with a user-friendly and responsive UI.
